

Expression of interest for TEMPUS project cooperation

We would like to offer our expertise in preparation and implementation of Tempus projects. We have successfully participated and co-ordinated several Tempus projects so far and have vast network of contacts around the Globe. We are very open to cooperation and new partnerships. Our administrative and expert capacity could support two Tempus project proposals at the moment. More information about our Institution and our fields of interest could be found further on.

About us

Faculty of Organization and Informatics (FOI) – is a medium-sized faculty belonging to the **University of Zagreb**. It has been active for 38 years now, and it is considered the leading higher education institution in Croatia to provide education in applied information technology and information sciences. University of Zagreb (1669) is the oldest and the biggest university in South-Eastern Europe consisting of 29 faculties, 3 art academies, Centre for Croatian Studies. With comprehensive programmes and over 50,000 full-time undergraduate and postgraduate students, the University of Zagreb represents the strongest teaching and research institution in Croatia and one of the most important higher institutions in the South-Eastern Europe.

Until now, the Faculty has been involved in many EU funded projects and programmes, commercial projects funded by industry/business or public sector institutions, and scientific projects that were in line with national research and scientific policy and funded by the state. Concerning the EU funded projects the Faculty has experience in TEMPUS projects, FP6 / FP7, EUREKA, CEI and LLP projects.

Support to FOI's project initiatives are given through two Centres within the Faculty – the Center for International Projects and the Center for Application Development.

Besides, the Faculty of Organization and Informatics aims to develop its scientific and research activities and achieve excellence in the following research fields and topics:

- Technology enhanced learning
- ICT application in private and public sector
- Information systems management
- Business process reengineering
- E-government
- Organizational design
- Decision support systems
- Electronic and mobile business
- Software engineering, programming tools, paradigms and methods
- Service oriented architectures
- Information systems security
- Biometrics
- Multimedia systems
- Quantitative methods for decision making
- Risk analysis
- Project management and
- Strategic planning
